WAKOL Sealing Compounds for Food Packaging – Minimize risks in your work!

Covering every need of the canmaking industry

Wakol develops, produces, and sells Sealing Compounds for the metal packing industry for more than three decades. A full range of can end sealants is available for round and non-round ends. Besides showing best performance on all application technologies on the market, Wakol products are developed with a strong focus on ensuring consumer safety.

Already existing solutions for upcoming challenges

Wakol's technical team is keeping an eye on all of these developments. Our longstanding experience in formulation of sealing compounds has led to developments of product solutions, which can assist you to minimize risks in your compliance work. We have products with proven market performance which cover all of today's regulatory "hot topics". There are solutions for

1. products without usage of mineral oil-based plasticizers or film formation aids (no MOSH/MOAH)
2. products with very low extraction profile and low occurrence of NIAS
3. styrene free formulated compounds – EVA based sealing compounds are only available from Wakol on the market
4. free from natural rubber and other allergens.

Contact Wakol how you can benefit from our experience
